

BEACH CITY LIFT, INC.

BEACH CITY LIFT, INC. DRIVER SAFETY COURSE

The lift truck operator course involves evaluating your operators ability to operate a powered industrial truck (lift truck or fork lift) in a manner that incorporates safety as the primary directive.

The course generally will have no more than five people at a time and involves the following:

- 1- A written test to evaluate driver knowledge of safety and operation.
- 2- A training video to inform the students of procedures and methods for safe operation.
- 3- Physical driving evaluation
- 4- Question and answer session to educate students on all questions that they failed to answer correctly.

If the student passes the above and exhibit's the traits of safe operation, than they will be given a certificate of completion.

Classes last approximately one and half to two hours and the cost per student is 100.00 dollars each, or 80.00 each for five or more students. Please direct all questions or inquiries to Mike Cole.
